UNPARALLELED
QUALITY & ELEGANCE

Family owned since 1935,
CASTELLO® is
dedicated to luxury linens
through superior
craftsmanship,
impeccable style, and
unparalleled quality that
will captivate your
customers and create an
experience they will truly
adore.

Let us help you drape
your life in grandeur.

WELCOME

THE CASTELLO® DIFFERENCE

Our sheeting and table linens are made of 100% Combed Cotton in our factory in Italy, where linen weaving and finishing techniques have been mastered and passed down for generations.

Our towels are made of 100% Aegean Ring Spun Cotton in our factory in Turkey, a country renowned for its quality terry-weaving.

We also use finishing processes, such as mercerization and double-needle lockstitch hems, to ensure our products are durable against the daily wear and tear of your industry, laundering 250+ wash cycles.

CASTELLO® collections are renowned for their high-quality materials and precise production process. We are not just selling linens; we are creating an iconic style that speaks to elegance and sophistication.

SIMPLE ELEGANCE

PRODUCTS

The breadth of selections are almost infinite with our factories in Milan & Turkey. We have included some of our most popular items, but please reach out to our designers to chat about customization options.

BED LINENS

CASTELLO® bedding begins with our Primo Percale 200 Series and is complimented by our Classico Sateen 310 Series in plain, stripe or check.

We also offer our Sateen 400-600 sheeting in our Lusso Collection, and Sateen 800-1200 sheeting in our Grande Collection.

The best of the best is our Lussuria Collection, including Jacquard or custom sheeting in Pure Masters of Linen, or Mako Combed Cotton.

CASTELLO® Matelassés & Top Sheets are also available in both a 280 & 500 series in

Plain, Stripe & Jacquard patterns. Quilted covers in all sheeting fabrics are also available.

CASTELLO® fine Italian throws add that perfect finishing touch to your guest rooms. Whether folded at the foot of the bed or elegantly draped on the arm of a chair, throws offer that extra special something for your guests to enjoy

CASTELLO® also offers bedside mats that are made of twisted 100% Combed Cotton and can be customized with your company's logo. Although they don't seem to be commonplace, it is for that exact reason that this classic accessory will make an impression on your guests.

PRIVATE LABEL

The Private Label options offered by CASTELLO® provide a range of possibilities and benefits for businesses. With control over product development and branding, companies can create unique products that meet their specific needs. This control also allows for increased profits and cost reductions. By offering exclusivity with decreased competition, businesses can build a loyal customer base. Additionally, the flexibility provided by CASTELLO® allows companies to align their brand personality with their product offerings, further enhancing their appeal to customers.

Our designers would love to collaborate with your brand to set your property apart.

WASH & CARE

Natural fibers, cotton and linen can be damaged when they are bleached in high water temperatures and an acidic environment (pH lower than 7). We recommend following these simple instructions to extend the life of your linen.

WASHING

- New linen should be washed in cooler water temperatures for the first few washes at a temperature of 104°F (40°C); this will set the mercerization process.
- Future wash temperatures should be at 140°F (60°C), but for stubborn stains, temperatures can be raised to 205°F (96°C).
- Rinse thoroughly at a lower temperature, the washing machine must not be overloaded; the acceptable maximum load is two-thirds of the machine's capacity.

NOTE: For Castello's Matlasses & Merino Wool Throws we recommend dry cleaning for a longer life span and better appearance. They can be laundered, but please consider the possibility of shrinkage and diminished quality of appearance over time.

STAIN REMOVAL

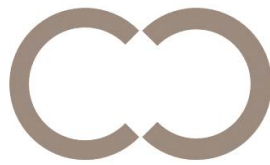

- Optical brighteners should be avoided, and chlorine bleach is NOT recommended, as this can have a negative effect on the appearance and the life span of the product. There are alternative stain removers available that work well and are less harmful to the environment.
- If necessary, sodium peroxide based bleach and enzymes can be used to remove heavy stains.
- Rinse thoroughly to remove any and all chemical agents; normal acidification is to be carried out at the end of the washing cycle.

DRYING & IRONING

- Linen can be conditioned in the dryer, but this is not necessary.
- Linen should be at least 52% damp before you introduce it to the flat iron.
- The flat iron should be between 325°F and 390°F (162.7°C and 198.8°C) throughout the entire machine and have the speed set at approximately 24.
- The use of a water spray bottle on dry areas as linen is being introduced to the flat iron can help.

CARE & STORAGE

- There should be a minimum of par 3, and preferably a par 5, inventory level at all times.
- Linen should be stored on the shelf after laundering for a minimum of 48 hours before re-entering into service; this will allow the fibers to relax before entering into service again.
- You should introduce your entire linen inventory into service, as the more time the linen is able to be on the shelf between washes, the longer life span your linen will have. Allowing the linens to rest will give the fibers a chance to relax after a vigorous cycle through the washing machine. By introducing your entire inventory of linen into rotation and allowing it ample rest time after laundering you are extending the life of your linens.
